## Assignment

In this scenario you are a new customer registering domain names for the first time. If any personal information is asked, use your own information.\*

There are two types of registration. One type is a new registration, the domain name you are registering does not exist yet and you are free to register it. The other type is called a transfer, this means the domain already exist and you own it but you would like some other company to manage it. In case of a transfer you might be asked to fill in a token, please use your last name if this is the case.

Use the system to order the following domain names:

[www.daanschraven.nl](http://www.daanschraven.nl)

[www.gieljanssenlok.nl](http://www.gieljanssenlok.nl)

[www.robbinjanssen.nu](http://www.robbinjanssen.nu)

Good luck.

\*We will not use your private information for anything else then this research, after the research your information will be removed from our storage.
