 - *Fragments*
 - *Layouts*
 - *R*
 - *Manifest*
- **Incrementer app**

Wat is Android en wat gaan we er mee doen?

INTRODUCTIE

Wie zijn wij?

Guy Ackermans

Derdejaars KI

guy.ackermans92@gmail.com

Tim Kutscha

Derdejaars KI

tim.kutscha@student.ru.nl

Daniel Roeven

Tweedejaars IC

daniel@roeven.com

Maurice Knoop

Vierdejaars IC

maurice.knoop@student.ru.nl

Wat is Android?

- OS voor telefoons,
tablets, ...
- Linux Kernel

Wat is Android?

Java

dynamisch

- Logica
- Events

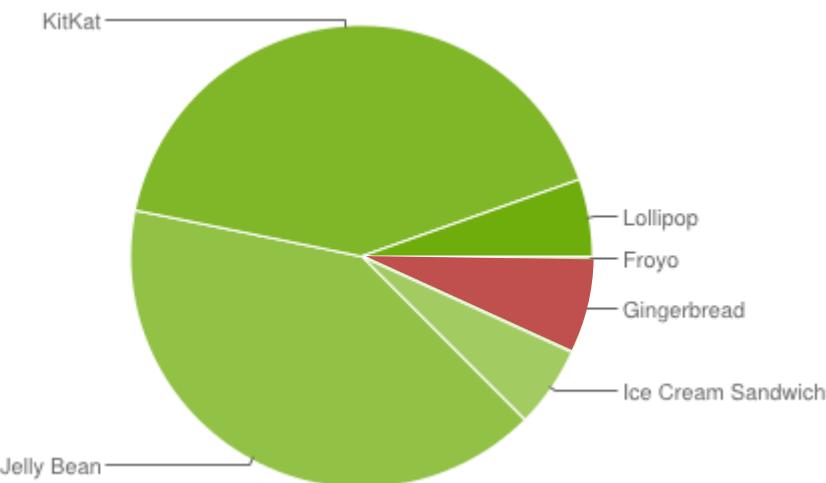

XML

statisch

- Opmaak
- Language support
- Manifest

Wat gaan we doen?

- Applicatie voor 4.0+
 - *API level 14+*

Android distributie op 06-04-2015

Disclaimer

- Slides zijn onvolledig
 - Je hoeft ze ook niet te leren
- Zelfstudie!
 - Documentatie is erg uitgebreid!
 - Tutorial videos

Android

ACTIVITIES | FRAGMENTS | LAYOUTS | R | MANIFEST

BASIS

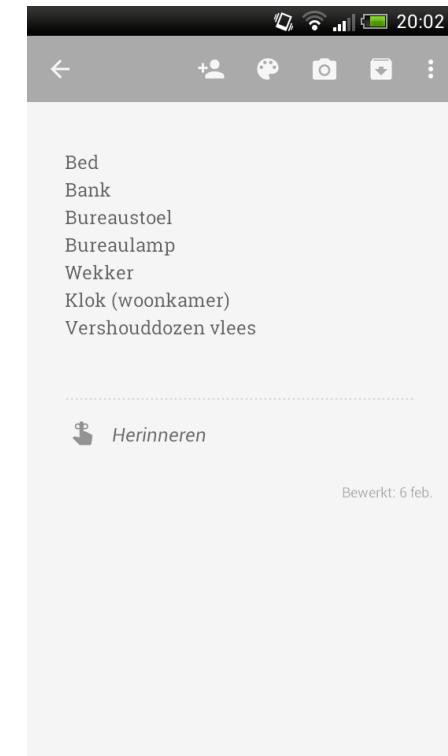

Wat is een Activity?

- Handeling binnen app
- Scherm

Overzicht

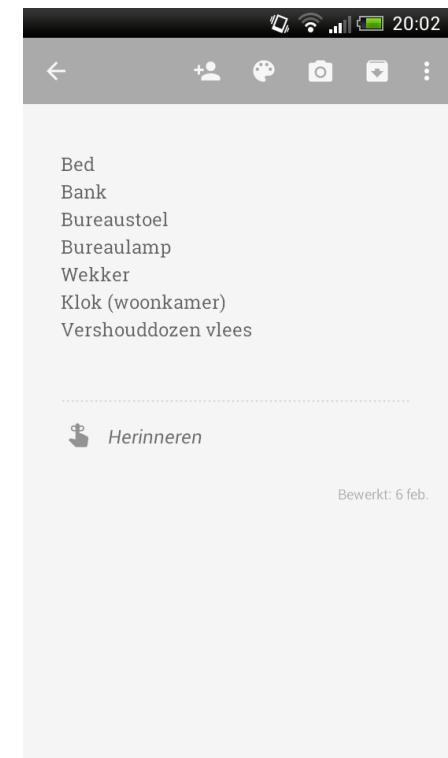

Notitie

Wat is een Activity?

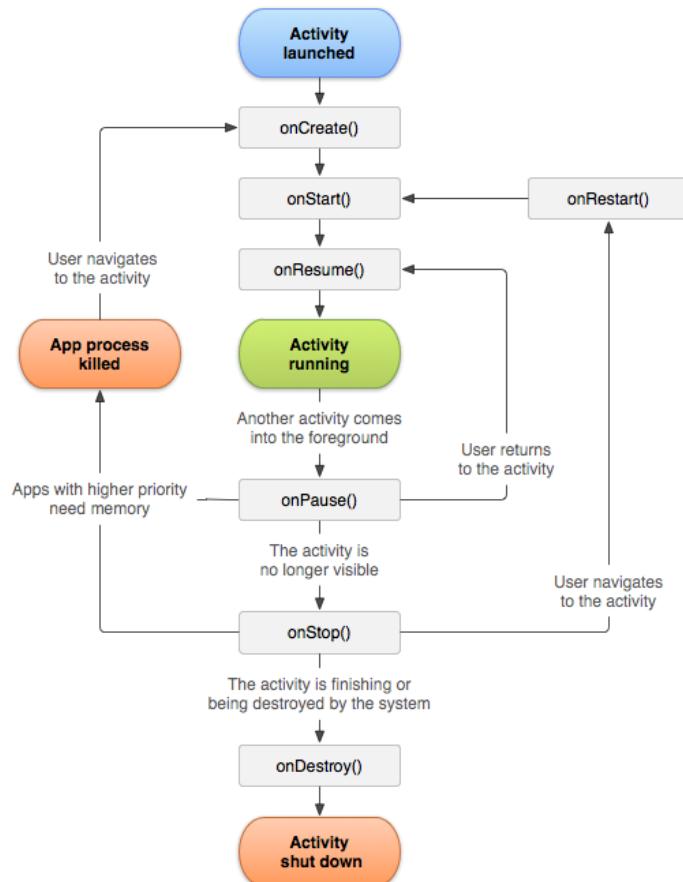

- Bevat logica
 - Clicks, touches
- Lifecycle
- *Beeldvullend (“Eén scherm”)*
- Meerdere vensters?

Notitie

Bewerkt: 6 feb.

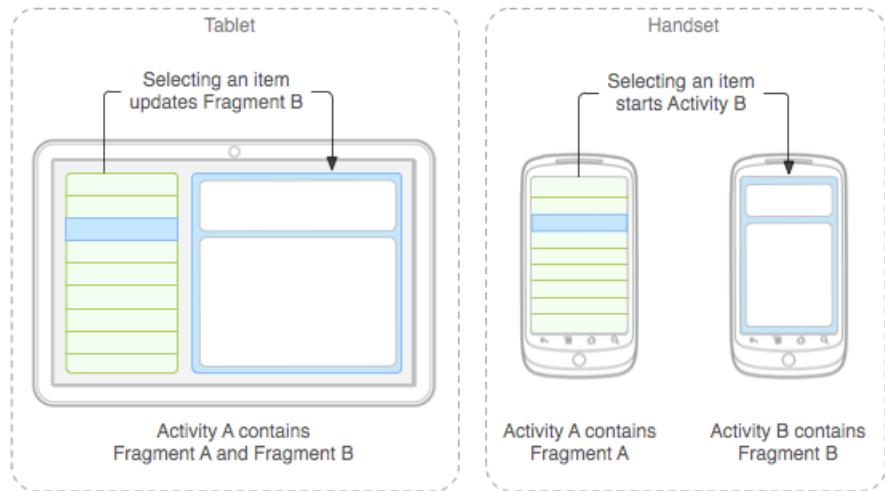

Wat is een Activity?

Key lifecycle moments

- (constructor)
 - Activity wordt gemaakt
- `onCreate(...)`
 - Activity wordt klaargezet
- `onPause(...)/onStop(...)`
 - Afsluiting, log uit, etc...

Wat zijn Fragments?

- Voor als je activity meerdere vensters/stappen bevat

Layouts

- XML
- Bouwstenen
 - TextView, EditText, ImageView
 - RelativeLayout, LinearLayout, ScrollView

Android Layouts

Layouts

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="#888" >

    <LinearLayout
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerHorizontal="true"
        android:layout_centerVertical="true"
        android:orientation="vertical"
        android:background="#A22"
        >

        <TextView
            android:id="@+id/textView1"
            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:text="@string/username"
            android:background="#AA2"
            android:textSize="25sp"
            android:layout_margin="5dp"/>

        <EditText
            android:id="@+id/editText1"
            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:hint="@string/password"
            android:background="#22A"
            android:textSize="25sp"
            android:layout_margin="5dp">

            <requestFocus />
        </EditText>

    </LinearLayout>
</RelativeLayout>
```

Android Layouts

Layouts

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:background="#888" >

    <LinearLayout
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_centerHorizontal="true"
        android:layout_centerVertical="true"
        android:orientation="vertical"
        android:background="#A22"
        >

        <TextView
            android:id="@+id/textView1"
            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:text="@string/username"
            android:background="#AA2"
            android:textSize="25sp"
            android:layout_margin="5dp"/>

        <EditText
            android:id="@+id/editText1"
            android:layout_width="match_parent"
            android:layout_height="wrap_content"
            android:hint="@string/password"
            android:background="#22A"
            android:textSize="25sp"
            android:layout_margin="5dp">

            <requestFocus />
        </EditText>

    </LinearLayout>
</RelativeLayout>
```

XML attributen

- Width, height
 - *wrap_content/match_parent*
- Id
 - *Alleen als je die later nodig hebt*
- Background
 - #ARGB, @drawable/

Java + XML

- Hoe verwijst je naar
 - XML layouts?
 - Afbeeldingen?
 - ...

Wat is R?

```
/* AUTO-GENERATED FILE. DO NOT MODIFY. */

package com.appic.music.player;

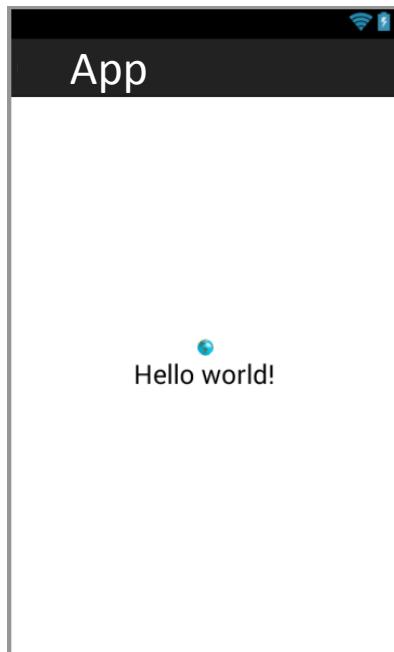

public final class R {
    public static final class attr {
    }
    public static final class dimen {
        /** Default screen margins, per the Android Design guidelines. */
        public static final int activity_horizontal_margin=0x7f040000;
        public static final int activity_vertical_margin=0x7f040001;
        public static final int play_bar_height=0x7f040002;
    }
    public static final class drawable {
        public static final int ic_launcher=0x7f020000;
    }
    public static final class id {
        public static final int action_settings=0x7f080003;
        public static final int btn_play_next=0x7f080002;
        public static final int btn_play_previous=0x7f080000;
        public static final int btn_play_state=0x7f080001;
    }
    public static final class layout {
        public static final int play_bar=0x7f030000;
    }
    public static final class menu {
        public static final int play=0x7f070000;
    }
    public static final class string {
        public static final int action_settings=0x7f050001;
        public static final int app_name=0x7f050000;
        public static final int hello_world=0x7f050002;
    }
    public static final class style {
        Base application theme, dependent on API level. This theme is replaced.
        public static final int AppBaseTheme=0x7f060000;
        /** Application theme. */
        public static final int AppTheme=0x7f060001;
    }
}
```

- Resources
- Automatisch gegenereerd
- Verwijst naar XML, afbeeldingen, etc...

Mogelijkheden met R

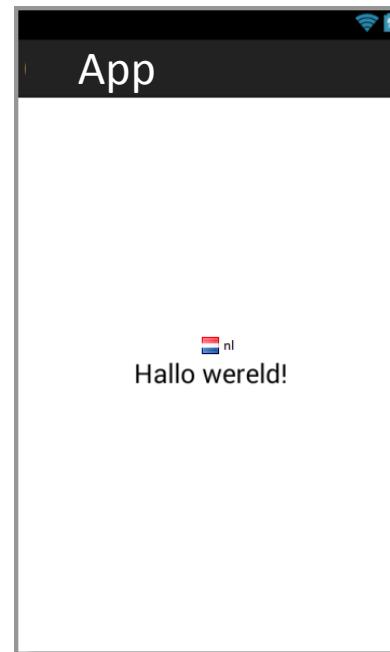

- Dynamisch gedrag
- Layouts
 - Landscape vs Portrait
- Strings
 - Vertalingen

Localisatie met R

values

```
<resources>
    <string name="hello_world">Hello world!</string>
</resources>
```

values_nl-NL

```
<resources>
    <string name="hello_world">Hallo wereld!</string>
</resources>
```

Hoe gebruik je R?

Java

```
(new TextView(context)).setText(R.string.hello_world);
```

XML

```
<TextView  
    android:layout_width="wrap_content"  
    android:layout_height="wrap_content"  
    android:text="@string/hello_world"  />
```

- Aantal functies gebruiken int
- Geef daar referenties mee
- In XML gebruik je @ voor referenties
 - @string/...
 - @id/...
 - @color/...
 - @dimens/...

Wat is het Manifest?

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    package="rend1.example.simpleapplication"
    android:versionCode="1"
    android:versionName="1.0" >

    <uses-sdk
        android:minSdkVersion="14"
        android:targetSdkVersion="19" />

    <application
        android:allowBackup="true"
        android:icon="@drawable/ic_launcher"
        android:label="@string/app_name"
        android:theme="@style/AppTheme" >
        <activity
            android:name="rend1.example.simpleapplication.MainActivity"
            android:label="@string/app_name" >
            <intent-filter>
                <action android:name="android.intent.action.MAIN" />

                <category android:name="android.intent.category.LAUNCHER" />
            </intent-filter>
        </activity>
    </application>

</manifest>
```

- Bevat informatie over app
 - Min. android versie,
 - Icon
 - Alle activities
 - Alle Permissions
 - *Entry points*
 - *Wat is het startscherm?*

Wat is het Manifest?

```
FATAL EXCEPTION: main
Process: rend1.example.simpleapplication, PID: 12596
java.lang.RuntimeException: Unable to start activity ComponentInfo{ rend1.example.simpleapplication/rend1.example.simpleapplication.MainActivity}: android.content.ActivityNotFoundException: Unable to find explicit activity class {rend1.example.simpleapplication/rend1.example.simpleapplication.SecondActivity}; have you declared this activity in your AndroidManifest.xml?
at android.app.ActivityThread.performLaunchActivity(ActivityThread.java:2195)
at android.app.ActivityThread.handleLaunchActivity(ActivityThread.java:2245)
at android.app.ActivityThread.access$800(ActivityThread.java:135)
at android.app.ActivityThread$H.handleMessage(ActivityThread.java:1196)
```

- Altijd declareren wat je gebruikt. Dit geldt voor:
 - Activity
 - Permissions
 - Internet
 - Accounts
 - Sd kaart
 - ...

Voorbeeld applicatie

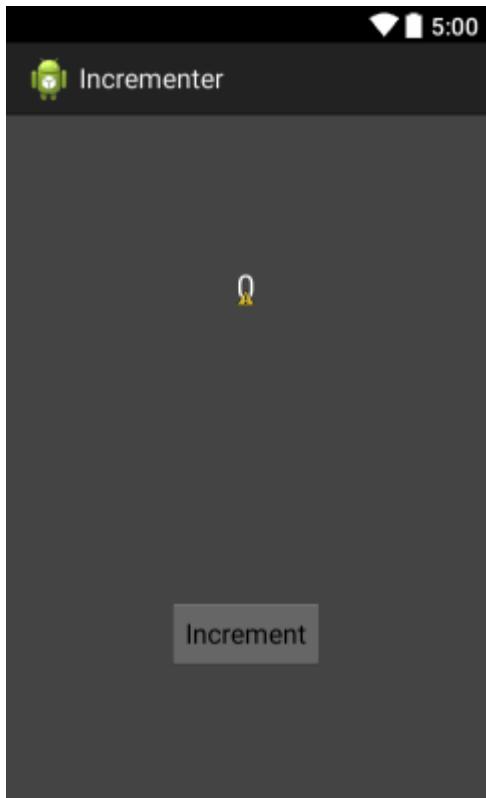

INCREMENTER APP

Requirements

- Knop voor incrementer
- Teller

Android Incrementer app

Layout

```
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity"
    android:orientation="vertical"
    android:background="#444">

    <RelativeLayout
        android:layout_width="match_parent"
        android:layout_height="0dp"
        android:layout_weight="1">

        <TextView
            android:id="@+id/counter"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_centerHorizontal="true"
            android:layout_centerVertical="true"
            android:text="0"
            android:textColor="#fff"
            android:textAppearance="?android:attr/textAppearanceLarge" />

    </RelativeLayout>
    <RelativeLayout
        android:layout_width="match_parent"
        android:layout_height="0dp"
        android:layout_weight="1">

        <Button
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_centerHorizontal="true"
            android:layout_centerVertical="true"
            android:onClick="increment"
            android:text="@string/increment" />

    </RelativeLayout>

</LinearLayout>
```

Android Incrementer app

Layout

```
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity"
    android:orientation="vertical"
    android:background="#444">

    <RelativeLayout
        android:layout_width="match_parent"
        android:layout_height="0dp"
        android:layout_weight="1">

        <TextView
            android:id="@+id/counter"
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_centerHorizontal="true"
            android:layout_centerVertical="true"
            android:text="0"
            android:textColor="#fff"
            android:textAppearance="?android:attr/textAppearanceLarge" />

    </RelativeLayout>
    <RelativeLayout
        android:layout_width="match_parent"
        android:layout_height="0dp"
        android:layout_weight="1">

        <Button
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:layout_centerHorizontal="true"
            android:layout_centerVertical="true"
            android:onClick="increment"
            android:text="@string/increment" />

    </RelativeLayout>

</LinearLayout>
```

Android Incrementer app

Strings

```
<?xml version="1.0" encoding="utf-8"?>
<resources>

    <string name="app_name">Incrementer</string>
    <string name="increment">Increment</string>
</resources>
```

```
        <RelativeLayout
            android:layout_width="match_parent"
            android:layout_height="0dp"
            android:layout_weight="1">

            <Button
                android:layout_width="wrap_content"
                android:layout_height="wrap_content"
                android:layout_centerHorizontal="true"
                android:layout_centerVertical="true"
                android:onClick="increment"
                android:text="@string/increment" />

        </RelativeLayout>
```

Activity

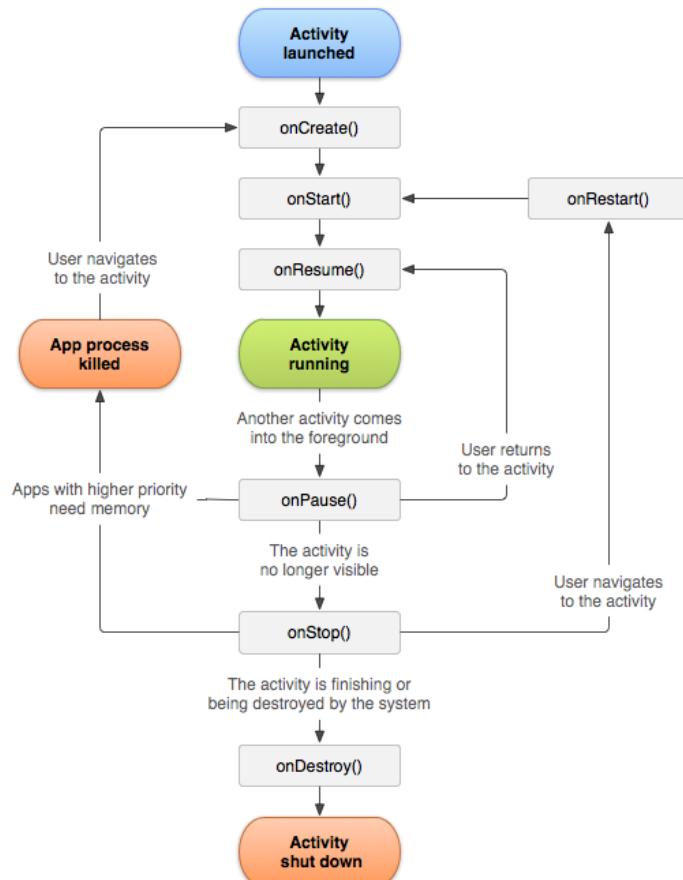

- Methode voor click event
- Counter
- View van counter

```
package com.example.incrementer;  
  
import android.app.Activity;  
  
public class MainActivity extends Activity {  
  
    private int counter = 0;  
    private TextView counterView;  
  
    // Called when Activity is created (visible)  
    @Override  
    protected void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        // Call to set layout  
        setContentView(R.layout.activity_main);  
  
        // Obtain reference to view  
        counterView = (TextView)this.findViewById(R.id.counter);  
    }  
  
    // Called when button is clicked  
    public void increment(View v)  
    {  
        counterView.setText(""+(++counter));  
    }  
}
```

Problemen

- Geen resetknop
- Zodra de app wordt gekanteld gaat de counter op 0.
 - Waarom?

Incrementer app

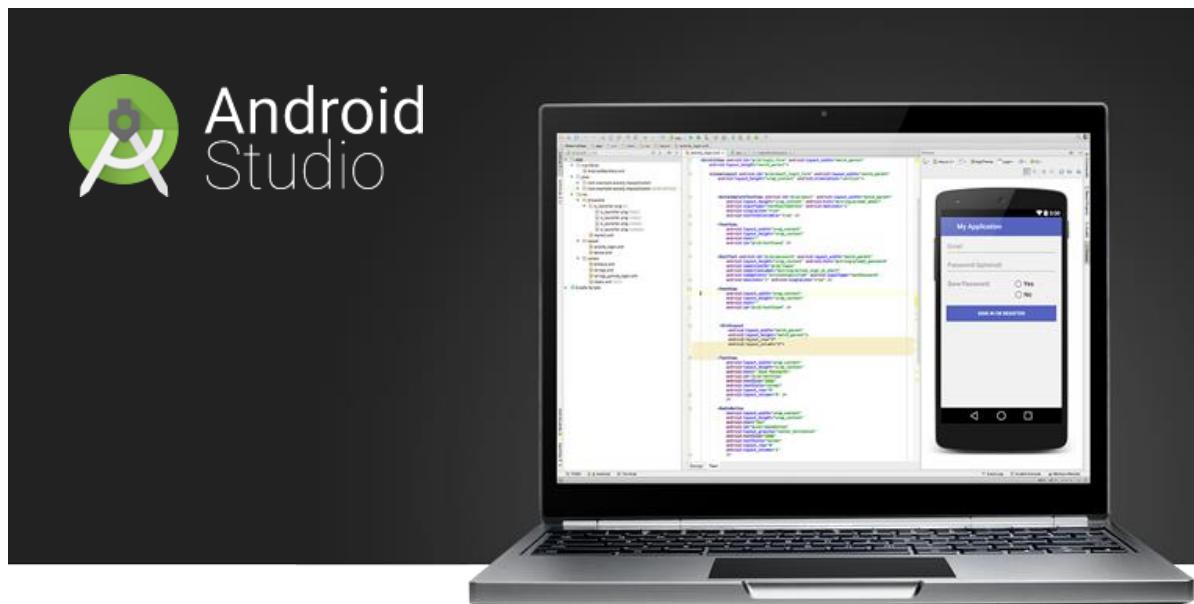

- Kantelen?
 - `onCreate(...)`!
- Oplossing?
 - State opslaan in `onPause(...)/onStop(...)`

Morgen om 10:45

- **Opstarten**
- **Aan de slag!**
 - Eigen laptop gebruiken?
 - Installeer vast alle programma's!
 - Zie volgende slides

Android Studio

<http://developer.android.com/sdk/index.html>
