

Feedback Usability Research Free(Lunch);

Good report. A few remarks:

- Test objectives were excellent. Well thought-out and introduced with clarity.
- Method was good, if a bit unstructured. There a bit on the method in the introduction, a bit in test objectives, a bit in tasks.
- Results were good. It was not clear, however, what the researchers asked during the stimulated recall interview.
- Conclusion was short. Try to answer each of the test objectives.
- Suggestions and style were good.
